Time : 7:00pm-8:30pm

Venue : Hong Kong Institute of Vocational Education (Morrison Hill)
Lecture Theater LT-01, 6 Oi Kwan Road, Wanchai, Hong Kong

Seminar Abstract

Continuing professional development has been encouraged and sometimes directed by employers and professional institutions as a mean to enhance self-competitiveness and to keep alert to current industry developments for their employees or members. In order to provide you with updated information on professional development opportunities, Professor T O Wallin will share with you his experience in professional developments for transport and logistics practitioners and students both in the States and Hong Kong.

Prof Wallin will also give a brief introduction on the Master of Arts in Transport Policy and Planning (MATPP) programme offered by the University of Hong Kong. The programme aims to provide the expanding transport sector in Hong Kong with a steady supply of well-trained professionals at the executive level, and provide training for graduates aspiring to pursue careers in the transport field.

The current MATPP student, Mr Jackson Lo, also the professional member of the Hong Kong Logistics Association and member of the Chartered Institute of Logistics and Transport (HK), will also give a seminar on “Introduction of Radio Frequency Identification (RFID)”. This topic has to do with understanding the application and potential of Radio Frequency Identification systems in Logistics and Jackson will show its prospects for wider use.

Registration is recommended due to limited seats available. For registration and enquiries, please contact Ms Carey Lau (MATPP programme demonstrator) at 2241-5722, or via e-mail at lauyya@hkucc.hku.hk

For registration through e-mail, please provide your full name, contact number and e-mail address.

All interested are welcome
