Cantonese

Practitioners in the
Logistics Industry

The local logistics practitioners are under pressure of speeding up their upgrading of operation under the continuous epidemic, which they need to enhance their competitiveness with digital technology, thus able to explore more business opportunities.

On 28 July 2021, SME One of Hong Kong Productivity Council will organise the webinar to bring the latest trends of the industrial transformation and technology application to the professionals of logistics industry. Moreover, the event will introduce the funding schemes suitable for logistics service providers and expect to boost more local practitioners to accelerate the steps of upgrading their operations with the government resources.
