

The Chartered
Institute of Logistics
and Transport

Railway and sea vessels are twin brothers in the transportation industry. Railway is equivalent in the capacity as "dry canal" which is independent of weather conditions. Integration of the two mega transportation facilities in port can achieve optimum loading capacity to reduce transportation costs. There are different port configurations designed for the container, dry bulk, liquid bulk cargoes. Nowadays, due to technology changes, container ports are becoming automated. The era of automated ports had come.

Date:	15 th November 2021 (Monday)		
Time:	12:45pm - 2:00pm		
Venue:	Online with ZOOM		
Fee:	Free admission'
