5G – Accelerator of Digital Transformation

Gordon GUO (gordonguo@hk.chinamobile.com)

Vice President of Corporate Market, China Mobile Hong Kong

Vice Chairman of Industry Committee, GBA 5G Industry Alliance

Mar-26, 2021

5G Commercial Launch

Europe: 27 operators launched 5G commercial use in 15 countries.
Sunrise: 300+ towns in Switzerland realize 5G commercial use.
BT/EE: 1500+ sites in 16 cities in the UK launched 5G.
Vodafone: 5G commercialization and roaming in 58 cities in 7 countries in Europe.

China: The largest in scale and with largest number of users.
Stations: > 550,000 by the end of 2020. Covers 340 major cities.

South Korea: The world's first 5G commercial network with more than 5 million users in 2019.

Japan: Realize 5G commercial use in March 2020.

U.S.: 4 major operators launched 5G, complying with 3GPP R15 international standard.

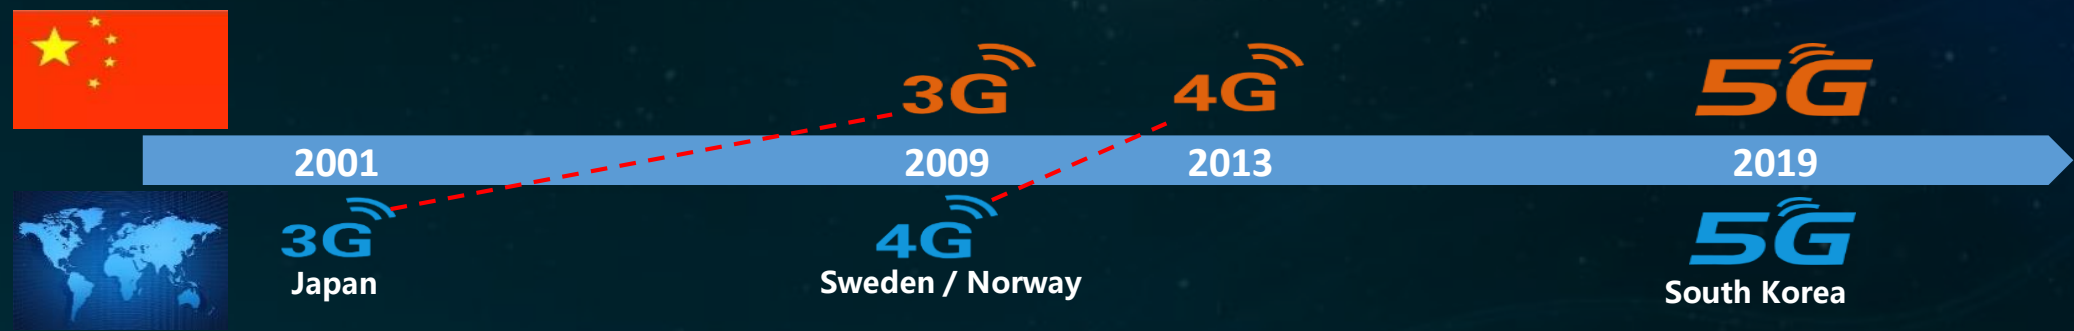

Australia: Optus and Telstra achieved 5G commercial use in Q2 2019.

Middle East: a total of 12 operators launched 5G commercial services, such as Kuwait, UAE, Qatar, Saudi Arabia, Bahrain.

South Africa: Rain launched in Oct 2019, mainly in core cities.

* Data source: GSA report, Mar 2020

Performance Requirements

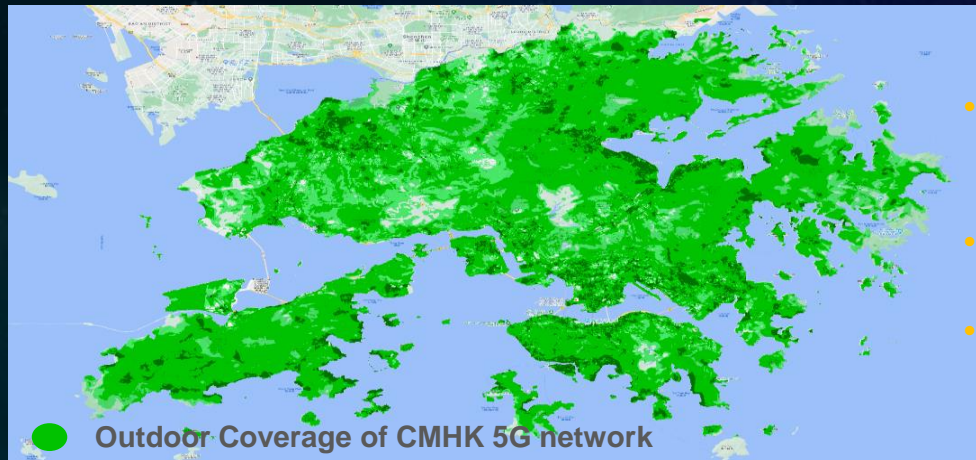

Efficiency Requirements

5G Leads "New Infrastructure"

Superior 5G Network

- **Apr-1 of 2020**, CMHK took the lead in commercially launching 5G service
- **Nov-26 of 2020**, commercially launched **1st 5G SA** network in HK
- **The MOST 5G roaming partners:** Mainland China, Taiwan China, South Korea, Thailand, Switzerland, Finland, etc.

3.3GHz spectrum
3.5GHz spectrum

CMHK has 80MHz contiguous bandwidth

- 60 MHz for Outdoor use
- 60+20 MHz for Indoor use

The most C-Band spectrum resource!

4.9GHz spectrum

High capacity covers the entire Hong Kong area, including **restricted areas of satellite stations**,

28GHz spectrum

400MHz of bandwidth provides the high capacity and speed services

Superior 5G Network

<e-zone> evaluation in Oct-2020:

- The Best 5G Network Award
- The Best Cross-Border Roaming Service Award

Speedtest indicated CMHK achieved the best 5G network performance

Joint Innovation Enables Vertical Application

5G CCTV Surveillance

CMHK launched
5G Drone Solution

5G Mobile Edge Computing

- High-level data protection
- Local offloading — save bandwidth & reduce delay
- Distributed computing power + edge application + cloud ecology

Smart Hospital

Industrial network

Smart Port

Smart Industry Park

全 程 智 能

FULL INTELLIGENCE

Smart Warehouse

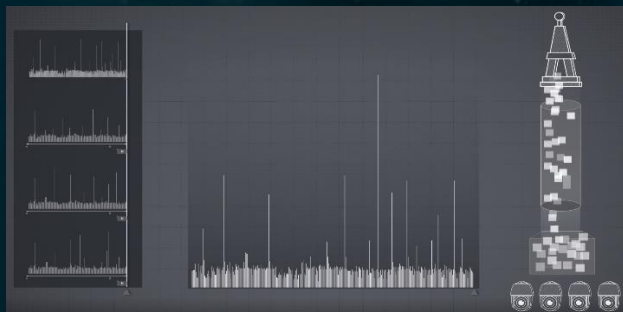

5G MEC + Smart Warehouse

5G Smart Camera

- Built-in 5G module, support 5G NSA/SA.
- Support 4k resolution, efficient H.265.
- Support flexible multi-camera networking.
- Optimization of 5G codec and transmission mechanism.
- Built-in AI chip, x Tops level algorithm.

Intelligent flow control, effectively controlling the peak flow of I frames

Overcome the influence of TCP flow control & increase the effective rate

All-connection Scenes (Fast Installation, No Wiring, Low Cost)

5G + AR / VR

5G + AR / VR

(Cloud Processing + Click & Play)

AR remote support: real-time monitoring & data exchange with expert support at back office.

VR for gaming, education: get rid of VR helmet cables, protect content copyright and reduce VR local processing power through 5G network.

Comparison of 5G / WiFi5 / WiFi6

	5G	WiFi5	WiFi6
Range	<ul style="list-style-type: none">Radius up to 100-300 Meters	<ul style="list-style-type: none">Radius up to X Meters	<ul style="list-style-type: none">Radius up to 35 Meters
Speed	<ul style="list-style-type: none">Supports theoretical speeds up to 10Gbps;Current downlink speed is 400Mbps~600Mbps	<ul style="list-style-type: none">Supports theoretical speeds of 2.34-3.47GbpsTypical speed of 100+ Mbps	<ul style="list-style-type: none">Supports theoretical speeds up to 9.6Gbps ;Currently device in use can only support up to 2.4Gbps with download speed about 300Mbps
Latency	<ul style="list-style-type: none">Air interface latency <1ms, D2D latency <5ms	<ul style="list-style-type: none">>30ms	<ul style="list-style-type: none"><20ms
Tech & Security	<ul style="list-style-type: none">Massive MIMOBeamforming3GPP Security	<ul style="list-style-type: none">MU-MIMO: Download OnlyISM Unlicensed Access	<ul style="list-style-type: none">MU-MIMO: Upload & DownloadOFDMAISM Unlicensed Access
Modulation	<ul style="list-style-type: none">1024 QAM	<ul style="list-style-type: none">256 QAM	<ul style="list-style-type: none">1024 QAM
Frequency	<ul style="list-style-type: none">3.3GHz, 3.5GHz, 4.9GHz, and 26GHz-28GHz; Licensed spectrum	<ul style="list-style-type: none">5GHz; Unlicensed spectrum	<ul style="list-style-type: none">2.4GHz & 5GHz; Unlicensed spectrum
Use Cases	<ul style="list-style-type: none">Supports autonomous cars, AR/VR and IoT, etc.	<ul style="list-style-type: none">Wireless display, rapid upload/download, etc.	<ul style="list-style-type: none">Supports business, residential and IoT services, etc.

Smart City

The new infrastructure built with 5G IoT, through the call of cloud and edge capabilities, uses AI and big data engines to drive the deployment of innovative applications to build a sustainable, win-win, and credible ecosystem to provide security for smart cities , Efficient and intelligent integrated intelligent operation system.

Intelligent Operation Center (IOC)

Smart Transport

V2N, V2I, V2P, V2V

Smart Healthcare

5G Ambulance, Remote Operation,
VR Visit, AI Diagnose, Remote
Consultation

Smart Environment

IoT based environmental
data collection

Smart Governance

AI inspection, Surveillance,
crowd management.

5G+X Opportunities in Hong Kong

- **The Four Key Industries** : Financial Services, Trading and Logistics, Tourism, and Professional and Producer services.
- **Selected Industries**: Cultural and Creative Industries, Medical Services, Education Services, Innovation and Technology, Testing and Certification Services, and Environmental Industries.
